

building leaders
+ stimulating value creation
x high degree of alignment
= creative + sustainable enterprise

The Next Institute is focused on two results: building leaders and stimulating value creation. When these two are aligned, the inevitable result is creative and sustainable enterprise. That's our commitment.

We view the best leaders as designers. Both require the ability to imagine what does not yet exist; to move forward with intention and purpose; to create new reality and meaning; to solve practical challenges. Whole Brain Thinking™ is required. We build that capacity.

We partner with HR specialists to create transformative experiences, in which the learning is simple, personal, memorable, transferable, and sustainable. We are experienced, innovative experts in adult and organizational learning. Our work is creative and experiential; rich in practical skill development; customized to build results for the enterprise.

We are always open to a conversation.
